Let's get started

As you launch into your JumpStart Program, it is important to remember that it is not about perfection, it is about the process of learning healthy habits to ultimately change your life and eating long term! There will be flaws, mishaps and questions along the way, but the key is staying committed to the process!

A balanced diet, and meal plan, is one that contains a variety of nutrient-rich foods including lean proteins, complex carbohydrates, healthy fats, fruits, vegetables and water. It's an eating plan that should be sustainable, one that

you enjoy and can consume with friends, family, at home, at work and when traveling. It supports healthy physical activity and provides you with the energy to manage the daily activities of everyday living. While it should be strategic, it should not be restrictive and should encompass a variety of foods.

While balance can mean a lot of things to many people, a good rule of thumb is to live by the 80/20 rule. 80 percent of the time focus on consuming nutrient-rich foods and beverages that provide your body the energy and nutrients it

needs to participate in exercise and maintain a strong, healthy life. 20 percent of the time there is room for some of the foods that you enjoy, but maybe should not be consumed every single day. Birthday parties, vacations and holidays will come, and you should enjoy them, but balance them with other healthy foods and activities.

The JumpStart Program dials in on the 80 percent. The goal is to commit to the 80 percent for four weeks to change your eating patterns and create long-lasting habits. Then eventually add the

20 percent in to create a balanced, sustainable eating plan.

Remember that balance isn't yes or no, always or never; instead, it consists of making healthy decisions on a regular basis to give your body the energy, nutrients and activity it needs.

This meal plan program was designed by a registered dietitian to provide you with a customized program to meet typical calorie needs and activity levels. Our goal is to make it easy for you to make healthy decisions, try new foods and enjoy what you are eating!

CHECKLIST FOR SUCCESS

FIND AN ACCOUNTABILITY PARTNER

An accountability partner is someone who checks in on you, encourages you and holds you accountable to what you have committed to do. This is not a person that nags you to do the right thing, but instead cheers you on to the win! On the reverse, you do the same for this person. While it may work for some people, typically we do not recommend you choose a spouse or family member as this person. This can often blur lines and make it harder. Choose a person you can communicate with regularly, but likely does not live in your house or affect your emotional well-being.

JOIN THE JUMPSTART YOUR JOURNEY FACEBOOK GROUP

The JumpStart Your Journey Facebook Group is designed to give you a community to talk to, ask questions and share ideas with. Things are often easier when you do them with friends, so be sure to join the Facebook Group to help you along the way!

SPRING CLEAN YOUR KITCHEN

Set yourself up for success by removing the tempting food items and junk food from your kitchen! It's springtime and everyone needs a fresh start, so take a day and clean out so that you are ready to stock your fridge and pantry with the nutrient-rich foods you need for success!

STOCK UP ON THE RIGHT FOODS

While each week of the meal plan will contain all kinds of meals and snacks, be sure to stock up on kitchen staples. You will see some trends through each week, but examples include your favorite veggies (including steam-in-the-bag) and fruits, oats, proteins, nuts, nut butters, olive and canola oil, etc.

GET THE RIGHT TOOLS

You can't have success without the right kitchen items available to use. Be sure to get a water bottle you love and can take with you wherever you go! Next, get a lunch box or bag so that you can take meals and snacks with you to work, running errands or when you are simply on the go. Finally, make sure you have resealable containers to store leftovers, prepared foods, and chopped fruits and veggies. Having the right kitchen tools will set you up for meal plan success!

Q: CAN I MIX AND MATCH MEALS?

A: Yes! The calorie guidelines are set so that all the breakfasts, lunches, dinners and snacks align. So, if you really love a certain meal, feel free to eat it again. If certain snacks are easier than others on busy days, stick with those to help fuel you!

Q: CAN I EAT MEALS IN VARIOUS ORDER?

A: While the meal plan is set up as breakfast, lunch, dinner and two to three snacks, depending on the calorie range, they do not have to be eaten in that order. Ideally you still consume all the meals and snacks over the course of the day, but let's say you want to move a snack from mid-morning to an early morning pre-workout snack,

totally okay! Or maybe you need two afternoon snacks because you have to eat a late dinner, that works as well! The goal is to consume all of the calories you need to help fuel your body and meet your goal, but that can be done in various order based on your schedule each day.

Q: CAN I SUBSTITUTE INGREDIENTS?

A: Yes, if there are things you don't like, there are options. There are swaps provided in the meal plan information. You can also use your Transformation Journal to cross reference foods and serving sizes.

Q: WHAT IF I AM A VEGETARIAN?

A: The "Swaps" section has some vegetarian and vegan substitutes for animal proteins. If you are a vegetarian, but still eat eggs and dairy, it should be fairly easy to swap out your protein with some simple tofu/tempeh swaps.

Q: WHAT TIMES SHOULD I EAT?

A: This is really dependent on your personal schedule! There is no specific time you have to eat in the morning or a time you should stop later in the day. Ideally you start eating within an hour or two of waking up, and then fuel your body every 3-4 hours with meals and snacks from the meal plan. In the evening, the goal would be to not eat the hour or so before you go to bed.

Q: WHEN SHOULD I EXERCISE?

A: When you feel the best and can commit to it! Everyone's schedule is different; some people are morning people, and some are not! Choose a time that works best for you and schedule it on your calendar. Treat exercise like an important work meeting and if you have to miss it, reschedule it!

Q: ARE THERE CHEAT DAYS OR MEALS?

A: The goal is to take the word "cheat" out of your head! The 20 percent of the 80/20 rule allows for desserts, higher calorie foods and cocktails. However, for this meal plan, the goal is to focus on the 80 percent as much as you can, but don't deprive yourself of cake at your child's birthday party or a drink once and a while. Remember the key word: balance!

Q: SHOULD CERTAIN FOODS BE ELIMINATED DURING THE CLEANSE PHASE?

A: While there are various opinions on what a “cleanse” is or should be, the AdvoCare Cleanse Phase (Days 1-10) does not cut out entire food groups. Anytime you cut out a whole food group, you set yourself up to possibly miss out on essential nutrients that your body needs. In addition, most of the thoughts and beliefs on eliminating food groups are based on myth and personal opinion versus science. If not eating a specific food or food group is a personal preference for you, you can use the “Swaps” section to identify what substitutes can be made to ensure you are getting adequate nutrition and calories for your meal plan range.

Q: CAN I DRINK COFFEE DURING THE CLEANSE PHASE?

A: Coffee is a zero-calorie beverage that can count toward total hydration goals. Note that if you put milk, cream and sugar or other sweeteners into your coffee, it needs to be accounted for. You can use calorie tracking websites or apps to see how many calories are in your coffee and adapt your meals accordingly.

If you prefer to eliminate coffee during the Cleanse Phase, that is fine as well. Sticking to water, Spark® and other low calorie beverages are adequate ways to hydrate.

Q: SHOULD I TRACK MY FOOD?

A: Tracking your food is often a great way to hold yourself accountable. If you are following the meal plan exactly, then you

know how many calories you are eating, but if it helps to fill in the blank meal plans or track with an app, then do it! Everyone is different and you should use the accountability tool that works best for you.

Q: CAN MY FAMILY DO THE MEAL PLAN WITH ME?

A: Yes! This meal plan is designed with nutrient-rich foods and meals that your whole family will love! Serving sizes may be different for them than they are for you, but they can definitely eat what you are eating! In fact, it is preferred as this program is about real life and helping you fit your eating needs in with your family and everyday life! While the 24 Day JumpStart products are for individuals 18 and up only, you can incorporate your meal plan for the whole family.

Q: WHAT WILL MY RESULTS BE IF I FOLLOW THE PROGRAM?

A: This is up to you! Everyone responds differently to the 24 Day JumpStart. AdvoCare cannot guarantee results from the meal plan so while you may experience some weight loss, you must remember weight loss is a marathon, not a sprint. Results after a lifestyle change take consistent work, usually over a period of 90 days. We encourage you not to eat as little as possible, but instead focus on fueling your body with the calories needed to help you meet your goal. Eating when you are hungry and stopping when you are satisfied is typically a good rule of thumb! The goal is that you have energy to live your life, chase kids, go to work, and exercise. Let the JumpStart Program help you fuel your best life!

10 STEPS TO SET YOURSELF UP FOR SUCCESS

#1

LIVE BY THE 80/20 RULE

Healthy eating has to fit into your lifestyle, or you will never be able to maintain it. While veggies should fill up a good portion of your plate, it is not realistic to say that you will never eat cake, ice cream or chips and queso again, so it is important to understand how to make all foods fit. Think of living by the 80/20 Rule. This means that 80 percent of the time you focus on eating nutrient-rich foods like whole grains, lean protein, healthy fat, fruits and veggies as well as exercising. Then, 20 percent of the time you can include foods that are higher in calories and lower in nutrients. You know, the ones that taste great, but that you shouldn't consume every day for your waistline and health's sake!

#2

WATCH THE NUTRIENT TIMING CLOCK

Nutrient timing is key to healthy eating. If you skip meals, you set yourself up to feel “starving” and likely to make less optimal food choices. The goal is to fuel your body with nutrient-rich foods every few hours throughout the day. Eating regularly helps stabilize your blood sugar and energy levels. It also helps you feel hungry and satisfied versus starving and stuffed! So, watch the clock and set the alarm for nutrient timing!

#3

PAY ATTENTION TO PORTIONS

Plates and portion sizes are bigger these days! Your goal is to think of eating until you are not hungry, instead of until you are full. While this is easier said than done, pre-

plating your food, portioning snacks into baggies and asking for a to-go container at the restaurant can help you have better portion control. A good rule of thumb is to fill half your plate with veggies, one-fourth lean protein and one-fourth whole grains. After you finish eating, if you are still hungry, go back for more vegetables

#4

GO WHOLE WITH GRAINS

Grains, or carbohydrates, are one of your body's main sources of energy. Your goal is to choose more whole grains like whole wheat, oats, quinoa, farro, couscous, etc. Whole grains have more fiber, which helps with heart and gastrointestinal health, while also helping you stay full a little longer. A small portion of grains at every meal can help stabilize your energy levels throughout the day.

“a goal without a plan is just a wish”

#5

POWER THE DAY WITH PROTEIN

Protein plays a variety of roles in the body including building lean muscle mass and slowing down digestion. High-quality protein sources are animal foods (including dairy and eggs) along with soy and quinoa. You can also find protein in plant foods like beans, legumes, nuts and seeds. Pairing protein with a high-fiber carbohydrate at each meal and snack will help stabilize normal blood sugar and energy levels over the course of the day. Eggs and oatmeal, chicken and rice, salmon and sweet potato and cheese with whole grain crackers are all great examples.

#6

GARNISH YOUR MEALS WITH HEALTHY FAT

Unsaturated fats like fatty fish, nuts, nut butters, seeds, avocado and unsaturated oils are essential for heart health. Because fat yields more calories per gram than carbohydrates and protein (9 calories per gram as compared to 4), think of garnishing meals and snacks with fat like nuts in your oatmeal or avocado on your wrap. Fat can help with satiety and keeping you full longer after a meal.

#7

FILL UP ON VEGGIES AND FRUIT

Full of fiber and nutrients, eat as many vegetables and fruit as you can! It is important to note, however, that fruit is a sugar and technically falls in the carbohydrate category. So, work on eating more

veggies! Each color packs a different nutrient package so aim to get a variety of colors.

#8

HYDRATE WITH THE RIGHT FLUIDS

Hydration is a key component to healthy eating. Ideally your goal is to drink water, but other low-calorie beverages count as well. Be sure that you are not adding sugar calories with your fluids from things like soda, sweet tea, fancy coffee beverages, juices and other sugar-sweetened beverages, as those can have a negative effect on health and your waistline. Plus, they typically don't make you feel full.

#9

READ FOOD LABELS OVER MARKETING ADS

Examining the food label can help you make more educated

decisions at the grocery store. Do not let yourself be persuaded by the advertisement on the package because sometimes it doesn't tell the whole nutrient story. Take time to look at the ingredients, as well as the calories, carbohydrates, fiber, protein and fat grams to ensure you are making a nutrient-rich choice.

#10

HAVE AN EATING GAME PLAN

Just like in a sports game or preparing a business proposal, having a plan is essential to success. Thinking and planning in advance is key to healthy eating. If you are going out to eat, check out the nutrition facts before you go. Have a busy week at work? Be sure to pack healthy snacks to fuel your day. Planning sets you up to make better decisions and makes healthy eating easier! Remember, a goal without a plan is just a wish, so get a plan in place!

MEAL PREP TIPS

Meal prep may seem overwhelming when you first start, but it can help you in a variety of ways! Dedicate a few hours and save time throughout the week.

1. GROCERY SHOP

- Make a grocery shopping list and stick to it! Go through each week's meals and snacks, compare it to what's already in your kitchen and make your list from there.
- If you're getting condiments, be mindful of the sugar and sodium content – Take a look at the food label and ingredient list to double check your choice.

2. PRODUCE PREP

- When you get home, take the time to peel, chop and cut all your produce.
- Put prepped veggies and fruit into containers in the fridge so that they are easy to grab for a snack or to toss into a dish for an easy dinner.

- Roasting is a delicious way to eat vegetables and often a great way to learn to like other veggies. Drizzle your veggies with olive oil, herbs and spices, and then cook on 400 degrees F for 45 minutes to an hour. Store in an air-tight container in the refrigerator. Veggies cooked like this can stay fresh in the fridge up to five days, making veggies an easy addition to weeknight meals.

3. SNACK-BAGGIE TEMPTING FOODS

- If foods that come in large packages like nuts and crackers tempt you to eat too many, try snack bagging them right after you grocery shop. Use the serving size on the box or bag to determine how many

servings are in the container. From there, get out that many snack bags and separate. This will make your life easier when it comes to snack time as well as help you watch your portion sizes.

4. PREP YOUR PROTEINS

- Having protein options already cooked can make it easier during the week!
- Flavoring your protein with basic seasonings can make it easier to add to various dishes.

5. MAKE BREAKFAST EASY

- Breakfast can be a struggle for many people due to morning time constraints so prep what you can beforehand.
- A great option to mix in advance or in the morning are the AdvoCare Meal Replacement Shakes. They can also be used to make overnight chia puddings.
- If oats or yogurt parfaits are on the weekly plan, consider prepping them the night before so you can grab and go.
- Have a back-up breakfast from the plan that's easy to grab in case time gets away from you!

A note on protein: based on the one-ounce (or equivalent) serving sizes above, most individuals should consume 3–4 ounces at a meal, to meet the 20–30 gram recommendation, and 1–2 ounces at a snack. Individuals may require more or less protein depending on individual needs and should seek the counsel of a registered dietitian for individualized recommendations.

ON THE GO + EATING OUT

There might be times you have to eat out and can't eat off the plan. Work trips, family events, kid's sports games and other things happen, so here are some easy tips to help match your meal plan and make a good choice on the go!

FRIDGE-FREE SNACK IDEAS FOR WORK BAGS, TRIPS AND DESKS

- Nuts
- Oatmeal packets or cups
- Individual nut butter cups or squeeze packets
- Turkey Jerky (Watch out for sodium levels and added ingredients)
- Whole grain crackers + individual nut butter cups or squeeze packets
- Tuna (in water)
- Protein Shakes (like AdvoCare Bodylean25™)
- Protein bars (like AdvoBar®)

TIPS FOR EATING AT RESTAURANTS

- Use the plate rule! A good rule of thumb is to make half of your plate veggies, one-fourth lean protein and one-fourth whole grains.
- If really hungry, start with a salad with dressing on the side.
- Consider ordering a lunch or kid's size portion.
- Share an entrée and get an extra side salad.
- Make your meal multiple colors (green, orange, red, yellow, etc.) as adding color typically means adding fiber, which can help you feel full faster.
- Ask your waiter for a to-go box and reserve half of your meal for later (portions served in American restaurants tend to be extremely large).
- Ask for your sauces, spreads and salad dressings on the side when possible.
- Substitute zucchini noodles or cauliflower rice instead of pasta.
- Look for words like baked, grilled, roasted, pan seared, sautéed and steamed.
- Avoid menu items with words like crispy, fried, battered, breaded, creamy, buttered, stuffed with, etc. in the description.
- Swap white buns or biscuits with a whole grain bun, English muffin or wrap.
- Substitute a side salad or fruit instead of fries or other fried side items.
